

June 2005

To whom it may concern

We can recommend Black Hills Institute of Geological Research from Hill City South Dakota. The Institute (B.H.I.), over a period of nearly 30 years, has supplied us with excellent products. They do expert preparation on original fossils. They do high quality casting and molding. And they do the best skeleton mounts available anywhere. We are very happy with what we got from them. Their products are quality products that last and can stand the test of time.
